Recalls

Recall # N130146

Recall Date: 5/15/2014

**LOW-BEAM HEADLAMPS INOPERATIVE
ZPSR**

Recall Description:

General Motors has decided that a defect which relates to motor vehicle safety exists in model year 2005-2007 Chevrolet Corvette vehicles, when the engine is warm, the underhood bussed electrical center (UBEC) housing will expand, causing the headlamp low circuit routed wire to bend slightly. After the wire is repeatedly bent, it can fracture and separate. When this occurs, the low-beam lamp will not illuminate. As the UBEC housing cools and contracts, the low-beam headlamp function may return. This condition does not affect turn signal lamps, marker lamps, turn signals, daytime running lamps or fog lamps.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been corrected, contact your local dealer.
