Recall # N090270
Recall Date: 10/26/2009
SDM RETAINING MOISTURE
ZPSR

Recall Description:

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2007-2009 model year Chevrolet Silverado and GMC Sierra vehicles. Some of these vehicles may have a condition where the sensing and diagnostic module (SDM), located beneath the driver's seat, may corrode due to a significant quantity of snow and/or water containing road salt or other contaminants entering the vehicle and saturating the acoustical padding beneath the carpet. The SDM is located under the driver's seat underneath the acoustical padding.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact your local dealer or visit GM's website.

Recall # N150438
Recall Date: 5/28/2015
SPI Air Bag Inflator
ZPSR

Recall Description:

Inflators subject to Takata equipment recall 15E-041 were installed in certain 2007-2008 model year Chevrolet Silverado and GMC Sierra 2500/3500 Heavy Duty pickup trucks as original equipment. In accordance with Takata's defect determination for these Takata inflators, GM is recalling these vehicles to replace these Takata inflators. The propellant wafers in some of the subject inflators may experience an alteration over time, which could potentially lead to over-aggressive combustion in the event of an air bag deployment. Depending on the circumstances, this potential condition could create excessive internal pressure when the air bag is deployed, which could result in the body of the inflator rupturing upon deployment.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact your local dealer or visit GM's website.
