HOOD LOUVER SEPARATION

ZPSR

Recall Description:

GM is recalling certain model year 2006 through 2010 Hummer H3 vehicles. Some of these vehicles have a condition in which the integral clip-tabs on the louver on the hood may fracture, causing the hood louver rattle against the hood and become loose. If this indicator is unnoticed, additional clips could fracture and the hood louver could detach from the vehicle.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HUMMER or visit GM's website.

CARPROOF searches many other data providers for vehicle details, and if there are any records found, the balance will appear in this section.
