Recalls

Recall # N140294

Recall Date: 6/30/2014

IGNITION KEY

Recall Description:

General Motors has decided that a defect which relates to motor vehicle safety exists in all 2010-2014 model year Chevrolet Camaro vehicles. There is a risk, under certain conditions, that some drivers may bump the ignition key with their knee and unintentionally move the key away from the "run" position. If this occurs, engine power, and power braking will be affected and power steering may be affected, increasing the risk of a crash.

Remedy

Dealers are to provide two replacement key rings. Vehicles with slotted keys will also receive key inserts. This will be provided free of charge. Please contact your dealer now to order parts. Until the recall has been performed, it is very important that you adjust your seat and steering column to allow clearance between your knee and the ignition key.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit GM's website.
